Wilkes University WebVPN Installation Guide

Cisco Anyconnect WebVPN client installation for Windows Operating systems.

1. Point a web browser to https://webvpn.wilkes.edu
   **This must be https and not http.

2. You will get a login Page as show below. Select a group and provide the correct login credentials. Username and password. This will be your Wilkes University Login.

   i.e ......Students will use the Student group.
3. Select Group
4. The Cisco Anyconnect Client will start the installation. This installation will be for the first login only. A Cisco Anyconnect VPN client will be installed to your local machine. You will need administrator level privileges to install the client on the local machine.

5. Once installation is complete. You will see Connection Established. You are now connected to the Wilkes University network via VPN.
6. You can verify the VPN connection by double clicking on the “Yellow Lock”
7. After disconnecting from the Anyconnect client. You can reestablish the Anyconnect VPN by doing the following. There is no need to visit the https://webvpn.wilkes.edu website after initial installation. You can visit the https://webvpn.wilkes.edu website if you wish or need to reinstall the Anyconnect client.

10. Select group and provide credentials and click connect.
11. Please contact the help desk at servicenow.wilkes.edu or at 408-4357 or 1-866-1462 if you need further assistance.
